Education

Indian Institute of Information Technology Ranchi

B.Tech in Computer Science and Engineering (CGPA: 8.71)

Ranchi, Jharkhand

2023 – 2027

Experience

RareLabs

Software Developer Intern

Remote

Jan 2026 – Mar 2026

- Engineered and deployed AI-powered full-stack web platforms for multiple clients using Next.js, React.js, Node.js, and modern development workflows, delivering scalable and production-ready solutions.
- Optimized frontend performance and user experience across client projects, reducing page load times by up to 55% through SSR, lazy loading, CDN caching, and asset optimization techniques.
- Developed dynamic dashboards, authentication systems, API integrations, and reusable UI architectures, accelerating development speed and improving maintainability across projects.
- Leveraged AI-assisted development tools including Cursor to streamline rapid prototyping, debugging, and feature implementation, enabling faster delivery cycles in a startup environment.

Zuddl

Front-End Developer Intern

Remote

Jun 2025 – Dec 2025

- Engineered 15+ high-performance responsive landing pages using HTML, CSS, JavaScript, enhancing UI consistency and reducing production bugs by 40%.
- Developed and integrated reusable UI widgets leveraging internal APIs, streamlining page creation workflows and accelerating build time by 3x.
- Orchestrated 10+ sandbox environments to simulate complex UI states and debug interactions, reducing design-to-development iteration cycles by 30%.
- Revamped core UI modules (forms, schedules, speakers, sponsors) to ensure scalability and consistency across 4+ layouts, achieving 100% cross-browser compatibility.

Personal Projects

EventFlow

2026

- Developed a full-stack AI-powered event management platform using React.js, Tailwind CSS, Node.js, Express.js, and MongoDB, enabling organizers and attendees to seamlessly create, manage, discover, and register for events through a responsive modern interface.
- Implemented secure JWT-based authentication and role-based access control supporting protected routes, dynamic event CRUD operations, attendee tracking, customizable registration workflows, and personalized dashboards.
- Integrated the Groq API to build AI-powered features including automated event description generation, intelligent registration form creation, and personalized event recommendations based on user interests and registration history.
- Engineered dynamic registration systems with organizer-defined custom fields, SMTP-based automated email confirmations, profile autofill functionality, and a premium startup-style UI featuring glassmorphism effects, responsive dashboards, and themed interactive components.

Technical Skills

- Languages:** C, C++, JavaScript (ES6+), TypeScript, HTML, CSS, SQL
- Frameworks:** React.js, Next.js, Redux, Tailwind CSS, Bootstrap
- Backend & Databases:** Node.js, Express.js, REST APIs, WebSockets, MongoDB, PostgreSQL, MySQL
- Developer Tools:** Git, GitHub, Postman, Vercel, Prisma, Figma, Framer, Redis
- Coursework:** Data Structures and Algorithms, DBMS, OS, Computer Networks

Achievements

- Top 11.37% on **LeetCode** (max rating 1727), demonstrating strong problem-solving skills.
- Achieved 2 Star rating (max rating 1563) on **CodeChef** with consistent contest participation.
- Awarded Best Girl Developer at Quasar 2.0 Hackathon for delivering an innovative and impactful solution under time constraints.
