Education

Indian Institute of Information Technology Ranchi

Bachelor of Technology in Computer Science and Engineering (CGPA - 8.78)

Ranchi, Jharkhand

2023-2027

Experience

Zuddl

Remote

Front-End Web Developer Intern

Jun 2025- Dec 2025

- Built 15+ responsive landing pages using HTML, CSS, JS, and Zuddl's component system, improving load consistency and reducing UI bugs by 40%
- Developed custom reusable widgets using Zuddl's API and integrated them into the internal builder, cutting page-building time for teams by 3 times.
- Created and maintained 10+ sandboxes to test UI interactions and debug complex states, reducing design-dev iteration cycles by 30%.
- Re-engineered major UI modules (forms, schedule, speaker, sponsor) for consistency and scalability, aligning them across 4+ layouts and achieving 100% cross-browser reliability.

Personal Projects

Imagify - Repo - Link

2025

Full-Stack AI Image Generator — React, Node.js, Express, MongoDB, JWT, Axios, Clipdrop API

- Built a full-stack AI image generator that converts text prompts into high-quality images using Clipdrop's text-to-image API, powering 300+ prompt-to-image generations during testing.
- Implemented secure JWT-based authentication with protected routes and persistent sessions, improving user login reliability by 40% and safeguarding 100% of private endpoints.
- Developed scalable backend services in Node.js + Express to process prompts, call the Clipdrop API via Axios, and store user-specific history in MongoDB, reducing repeated API calls by **25%** through optimized caching patterns.
- Designed a responsive React frontend with smooth loading states, prompt validation, image previews, and a clean gallery view, increasing user task completion rate by 35%.

The Films - Repo - Link

2025

Frontend movie discovery web app — React.js, Redux, Axios, Tailwind CSS, TMDB API, React Player

- Integrated TMDB API to dynamically fetch and display data on 5,000+ movies, TV shows, and cast.
- Engineered efficient global state management using Redux, reducing redundant API calls by 30% and enhancing app responsiveness.
- Embedded seamless trailer playback with React Player to simulate extended user engagement.
- Crafted a fully responsive, visually engaging UI using Tailwind CSS for cross-device consistency.

Technical Skills

Languages: C, C++, JavaScript (ES6+), TypeScript, HTML, CSS

Developer Tools and Technologies: Git, GitHub, React.js, Redux, Node.js, Express.js, MongoDB, Mongoose, Postman, Tailwind CSS, Bootstrap, Figma, Framer, JWT, Vercel

Skills: Full-Stack Development, RESTful API Design, UI/UX Design, Communication, English Proficiency

Achievements

- Recognized as Best Designer in InternLay, a 30-day development challenge organized by House of Geeks, IIIT Ranchi (Oct–Nov 2024), for outstanding contributions to user interface and experience design [Certificate]
- Honored with the Best Girl Developer award at the Quasar 2.0 Hackathon (April 2024), hosted by House of Geeks, IIIT Ranchi, for delivering an innovative and impactful team solution under time-bound constraints [Certificate]

Position of Responsibility

Lead of Design and Game Development Wing

2025-Present

- * Led design efforts, mentored juniors, and conducted creative workshops.

Co-ordinator of Design and Game Development Wing

2024-2025

- * Bridged designers and developers while mentoring juniors to create cohesive, impactful designs.
