Education

Indian Institute of Information Technology Ranchi

B.Tech in Computer Science and Engineering (CGPA: 8.71)

Ranchi, Jharkhand

2023 – 2027

Experience

RareLabs

Software Developer Intern

Remote

Jan 2026 – Mar 2026

- Engineered and deployed AI-powered full-stack web applications using Next.js, React.js, and Node.js, delivering scalable production-ready solutions for multiple clients.
- Optimized frontend performance, reducing page load times by up to 55% through SSR, lazy loading, CDN caching, and asset optimization.
- Built dynamic dashboards, authentication systems, reusable UI components, and API integrations while leveraging Cursor AI to accelerate development and feature delivery.

Zuddl

Front-End Developer Intern

Remote

Jun 2025 – Dec 2025

- Engineered 15+ responsive landing pages using HTML, CSS, and JavaScript, improving UI consistency and reducing production bugs by 40%.
- Built reusable UI widgets with internal API integrations, accelerating page development by 3x and improving maintainability.
- Revamped core UI modules and built 10+ sandbox environments for debugging, reducing design-to-development iterations by 30% while ensuring cross-browser compatibility.

Personal Projects

Echo: Real-time Collaborative Workspace

2026

- Engineered a real-time collaborative workspace using Next.js, Express.js, PostgreSQL, Socket.IO, and TypeScript, implementing a custom document synchronization engine with conflict resolution, offline synchronization, and eventual consistency.
- Architected an event-driven backend using Apache Kafka, Redis, and BullMQ, enabling scalable document synchronization, presence tracking, and reliable background job processing through asynchronous message queues.
- Designed a modular monolith with clean layered architecture using Prisma ORM, Docker, GitHub Actions, and AWS EC2, delivering a production-ready application with JWT authentication, role-based access control, and automated deployment.

VedaAI: AI-Powered Assessment Generation Platform

2026

- Built a full-stack AI-powered assessment platform using Next.js, TypeScript, Express.js, MongoDB, Redis, and BullMQ, enabling educators to generate customizable exam papers.
- Implemented asynchronous message queueing with BullMQ and Redis to offload AI generation jobs, integrating Groq LLM, Zod validation, and WebSocket-based real-time progress tracking for reliable background processing.
- Engineered exam-style PDF generation, regeneration workflows, Redis caching, and a fully responsive interface, delivering a scalable assessment management experience.

Technical Skills

- Languages:** C, C++, JavaScript (ES6+), TypeScript, HTML, CSS, SQL
- Frameworks:** React.js, Next.js, Redux, Tailwind CSS, Bootstrap
- Backend & Databases:** Node.js, Express.js, REST APIs, WebSockets, MongoDB, PostgreSQL, MySQL, BullMQ
- Developer Tools:** Git, GitHub, Postman, Vercel, Prisma, Figma, Framer, Redis, Docker, Kafka, AWS EC2
- Coursework:** Data Structures and Algorithms, DBMS, OS, Computer Networks

Achievements

- Top 9.17% on **LeetCode** (max rating 1775), demonstrating strong problem-solving skills.
- Achieved 3 Star rating (max rating 1600) on **CodeChef** with consistent contest participation.
- Awarded Best Girl Developer at Quasar 2.0 Hackathon for building an innovative solution.
